Subject: RE: San Jacinto Daily Reports

Your welcome – Daily Reports for last Thursday and Friday are attached. The field crew also went out Saturday with Wendell on Site. There was a very low tide again because of north winds, and they were able to do a visual inspection and some additional probing and QC checks. They are finishing up the probing today and also installing the pads for the security system. As you know, we have a few small areas of geotextile that we need to address, and plan to do that tomorrow if the weather permits.

I'll send you a daily report for Saturday's work later today and will also follow up with you on our plans for tomorrow. Are you in the office today, or are you headed back over to Houston?

Regards,
David
